

Sheet Metal Tools CONT'D

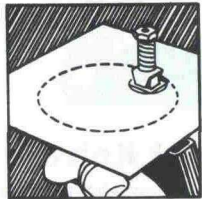

Cuts both internally and externally!

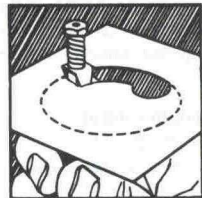

Internal Cuts

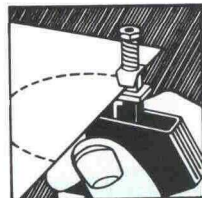

1. Drill a 7/16" hole in work material.

2. Insert tool up thru hole until work material rests on platform directly below cutting blade.

3. Squeezing handles, guide tool along, nibbling to size and shape desired.

External Cuts

1. Position tool so that the edge of the work material rests on platform directly below cutting blade.

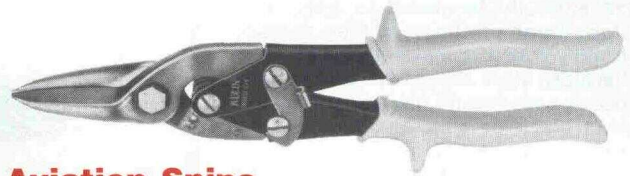

2. Squeezing handles, guide tool along, nibbling to size and shape desired.

Nibbler Tool

Cuts soft sheet metal up to 18-gauge and plastic, soft copper and aluminum up to 7/16" and tubing from a 1" I.D. with a squeeze of the handle. Ideal for air conditioning and heating installation, automobile work, model making, and home improvements.

Cat. No.	Description
76011B	Nibbler cutting tool complete with blade.
76012B	Replacement blade for No. 76011B Nibbler cutting tool.

Aviation Snips

Compound action increases leverage for maximum cutting ease. Cuts all sheet metals up to 18-gauge with half the effort of conventional snips. Available in left, right and straight cutting patterns. Hot drop-forged jaws of tough, durable molybdenum steel to stand up under compound-lever action and the cutting of heavy stock. Self-opening action for fast, easy feed. Latch keeps jaws closed when not in use. Length of cut 1 3/8" (3.5 cm). Handles of electric-furnace steel for extra strength. Handles are contoured and plastic-dipped to provide a firm, comfortable grip; color-coded by cutting pattern.

Cat. No.	Cutting Pattern	Color Code	Overall Length
1100L	Left	Red	9 3/4" (24.8 cm)
1101R	Right	Green	9 3/4" (24.8 cm)
1102S	Straight	Yellow	9 3/4" (24.8 cm)
P406	Replacement Spring for Nos. 1100L and 1102S.		
P407	Replacement Spring for Nos. 1101R.
