Fall-Arrest/Positioning Harness With Leg, Seat, Waist, Chest & Shoulder Straps and Integral Positioning Belt with Tongue Buckle

This premium full-body harness features Ultra-Hyde-lined waist and leg straps with tongue buckle and grommeted holes. It is designed to arrest free falls and to

distribute impact forces over thighs, pelvis, waist, chest and shoulders as required by OSHA. Integral waist belt has D-rings with rollers at each side that permits harness to be used for positioning. Extra tough harness is ideal for workers on transmission towers and other elevated sites. The leg, seat, waist, chest, and shoulder straps provide freedom of movement and extra comfort in normal use as well as support during and after a fall. Shoulder, chest, and waist strap colors contrast with leg and seat colors to simplify putting the harness on. **Harness component:** Harness is equipped with one adjustable, forged, circle D-ring with roller at back for attaching a fall-arrest connecting device. Harness is made of rugged 1-3/4" (44 mm) Type 19, or equivalent, nylon webbing. The chest strap features a friction-style buckle. Shoulder straps have friction slide adjusters for optimum fit. This harness is certified and compliant with ANSI and CSA requirements.

Fall-Arrest/Positioning Harness Ironworker's Full-Body Harness with Nylon Cushion Pad

A comfortable full-body harness designed to satisfy the unique mobility, tool and equipment storage needs of the Ironworker.

Belt Component: One end of the waist belt can be removed to slide on a bolt bag, tie wire reel or bull pin holder; whatever tunnel-looped or slotted tool pouch is needed to make the job easier. The 5-inch cushioned body pad provides added support and comfort when working where positioning is required. Positioning D-rings have rollers at each side that permit the harness to be used for positioning. **Harness Component:** Harness is equipped with one adjustable, forged, circle D-ring with roller at back for attaching a fall-arrest connecting device. Each shoulder strap has shoulder pads to cushion the weight of the harness when it's loaded with tools, parts and equipment. Constructed of durable 1-3/4" (44 mm) Type 13 nylon webbing, this harness is certified and compliant with ANSI and CSA requirements.

Fall-Arrest Harness

With Leg, Seat, Waist, Chest & Shoulder Straps

This comfortable, lightweight, full-body harness is designed to arrest free falls and distribute impact forces over thighs, pelvis, waist, chest and shoulders as required by OSHA. The leg, seat, waist, chest, and shoulder straps provide extra comfort in normal use as well as support before, during and after a fall. Shoulder, chest, and waist strap colors contrast with leg and seat colors to simplify putting the harness on. **Harness component:** Harness is equipped with one adjustable, forged, circle D-ring with roller at back for attaching a fall-arrest connecting device. The harness is made of tough 1-3/4" (44 mm) Type 13, or equivalent, nylon webbing. Shoulder straps have friction slide adjusters for optimum fit. Both the waist and chest straps feature friction-style buckles for positive securement. Leg straps have tongue buckles with grommets holes. This harness is certified and compliant with ANSI and CSA requirements.

87020	Medium
87021	Large
87022	Extra Large
87023	2X Large

Add Positioning to Your Fall-Arrest Harness

For workers who also need positioning in addition to fall arrest, this harness allows insertion of an existing Klein positioning belt. **Never use a belt for fall arrest.** Belt inserts through 5" (127 mm) back-strap loops on the harness.
