Complementary Partners and Products

Our Complementary Automation partners offer products and services to enhance your automation systems, reduce downtime, and extend equipment life.

EESCO and our partners are staffed with dedicated experts who can help with product selection and application engineering. Find out more with a call to your EESCO customer service representative at **1-800-330-0011**.

EESCO Distribution, Inc.
2401 Internationale Parkway
Woodridge, Illinois 60517
Phone: 630-296-2555
www.buy.eescodist.com

Predict, Prevent, Improve.

Enhance the physical operation of your automation line and gain insight into the efficiency and life cycle status of your equipment with hardware and software from the companies listed here.

EESCO is your source for a complete solution that ensures your line can meet the demands you place on it.

ACP Thin Client

www.thinmanager.com

ACP, a global leader in the automation industry, provides full-feature centralized thin client and terminal server management software. Their unique platform offers trendsetting centralized management solutions for the modern factory by simplifying management of applications and visual resources. When combined with ACP's ThinManager, each client has performance and features unmatched by products from any other company.

Advanced Micro Controls, Inc.

www.amci.com

Advanced Micro Controls Inc (AMCI) is a leading U.S. based manufacturer with a global presence. Their Industrial Controls are sold all over the world, improving the performance of today's factories and automation systems. With eight different product families, including Stepper Motor Control, PLC Modules, Rotary Sensors, Networked Devices, Stand Alone Solutions, Packaging Systems Controls, and Stamping Press Technologies, AMCI products can be found everywhere. AMCI products help to make factories run more efficiently, product manufacturing smarter, and automation environments more productive.

Apex Dynamics, Inc.

apexdynamicsusa.com

Apex Dynamics, Inc. designed and built a technically advanced, high speed, low backlash servo application planetary gearbox. Their breakthrough patented technology (over 6 patents), provides the optimum high precision helical reducer at a reasonable price and is offered with the only tip-to-toe 5-Year warranty in the industry today, including the seals and bearings.

Arista Corp.

www.goarista.com

Arista Corp. was incorporated in 1994, with a focus on providing the finest industrial rackmount solutions available. Today, Arista designs and manufactures a wide range of fanless computers, industrial rackmount computers, powerful wall-mount computers, long-life industrial displays, high reliability micro computers, shoebox computers, industrial tower computers, ruggedized tablet computers, embedded board computers and much more.

Belden

www.belden.com

Belden has brought together a comprehensive line of industrial cabling, connectivity and networking devices, offering the most reliable communications solutions for your application. Belden has the products to network your devices to the controllers, connect the controllers to the control room, relay data between the control room, the engineering department, and remote manufacturing sites.

Bonitron

www.bonitron.com

Products include Uninterruptible Power for Drives (DC Bus Ride-Thru), Common Bus Power Supplies, Braking Transistors and Resistors, Line Regens, Portable Capacitor Formers

Datalogic

www.datalogic.com

Datalogic's core specialties are Automatic Data Capture and Industrial Automation for the retail, manufacturing, transportation and logistics, and healthcare industries. As a total solutions provider, Datalogic has a long history of creating innovative bar code readers, data collection mobile computers, sensors, vision systems and laser marking systems that meet the ever-changing demands of industry.

EPLAN Software and Service

www.eplanouengineering.com

EPLAN develops software-based engineering solutions for mechatronics and implements tailored CAD, PDM, PLM and ERP interfaces in order to accelerate product development processes and reduce engineering costs. The EPLAN Platform is a powerful database centric, object-oriented architecture solution used for efficient and cost effective design of electrical, fluid power, process control systems and 2D/3D enclosure layout.

Exlar

www.exlar.com

Exlar Corporation designs and manufactures roller screw linear actuators, rotary servo motors, and electronic products for motion control applications. Exlar's patented actuator technology offers many times the life of ball screw actuators and provides an efficient electro-mechanical replacement for your hydraulic or pneumatic cylinders.

Burkert Fluid Control Systems

www.burkert.us

Burkert is one of the world's leading companies for measurement, control and regulation technology. Over 2100 employees in 34 countries are constantly engineering systems and solutions in response to the dynamic and exciting challenges presented by water, steam, gases and other media.

FLIR Systems Infrared

www.usd.flir-direct.com

FLIR Systems is the world leader in infrared technology. FLIR Systems offers the most affordable and advanced infrared cameras available for multiple applications including predictive maintenance. Extech Instruments offers a complete line of meters packed with innovations at a low price.

Fluke

www.fluke.com

Fluke Corporation is the world leader in compact professional electronic test tools. From industrial maintenance to commercial building operations, Fluke tools deliver the testing and troubleshooting capabilities to keep the world up and running. Product categories include troubleshooting and calibration tools for process technicians; thermal imagers, including the only infrared cameras with LaserSharp® Auto Focus; Fluke Connect, the world's largest suite of connected test tools, power quality analyzers; and electrical test tools.

Grace Engineered Products, Inc.

www.graceport.com

Grace is the industry leader of Permanent Electrical Safety Devices (PESDs), which allow for thru-door electrical safety, enhanced compliance to industry standards and increased employee productivity. Moreover, they are best known for their line of fully-customizable PLC ports, called GracePorts®. Their purpose is to keep people away from live voltage. They strive to come up with new ideas and innovative products that allow workers to perform their tasks productively while also increasing their safety by reducing the risk of arc flash and electrocution.

Hardy Process Solutions

www.hardysolutions.com

In almost all industries, manufacturing operations require materials to be weighed at some point of the production process. Hardy Process Solutions will help you improve process efficiencies and achieve operational excellence. Their GOOD, BETTER, BEST solution offerings give you the choice to match your operational needs and your budget. Whether your solution needs to align with BASE (\$'s), PERFORMANCE (KPIs) or ADVANTAGE (OEE), we have a solution and product line to match your requirement.

Hirschmann

Hirschmann, A Belden Brand

www.hirschmann.com

Hirschmann™ industrial switches and active devices combine with Belden cabling, connectivity and cable management products to provide an unparalleled set of solutions for Industrial Ethernet networks. Only Belden provides solutions for Open System Interconnection (OSI) Layers 1, 2 and 3 to ensure our customers' networks are optimized for completely reliable performance.

Put EESCO's Team to Work!

If you engage EESCO early in the design process for CAPEX projects we can deliver value and cost savings between 18-22%. See the back cover for more information.

HMS Industrial Networks, AB

www.anybus.com

HMS develops and manufactures state-of-the-art hardware and software for industrial communication. Their products are translators between industrial devices and the different networks that exist on the market. HMS can offer a complete solution — from product development through manufacturing and support. This makes them a unique and market-leading industrial communication partner.

item North America

www.itemamerica.com

item North America uses the high-quality Machine Building Kit System of item International to design mechanical solutions for a wide range of industrial applications. Using item's high-quality Machine Building Kit System is not the only value item North America brings to projects. Additionally, they offer no-cost engineering services, as well as an experienced sales team with customer service a first priority. By collaborating closely with distributors, end users, and original equipment manufacturers, each solution they propose is properly designed using the most appropriate components available.

Marathon Electric Motors

www.marathonelectric.com

Since 1913, Marathon Motor's name has been recognized for engineering excellence, custom-designed products and an extensive product line of industrial quality motors, available in all popular enclosures from 1/12 - 3000 HP and in a variety of mounting configurations. Designed for inverter or vector applications where up to a 1000:1 Constant Torque speed range is required. Typical uses include: material handling, machine tools, conveyors, crane and hoist, metal processing, test stands, pumps, compressors, textile processing, and other industrial machinery installed in dusty and dirty environments.

molex®

Molex

www.molex.com

Providing more than connectors, Molex delivers complete interconnect solutions for a number of markets including: data communications, telecommunications, consumer electronics, industrial, automotive, commercial vehicle, aerospace and defense, medical, and lighting. Established in 1938, the company operates 45 manufacturing locations in 17 countries.

YASKAWA

Motoman

www.motoman.com

Founded in 1989, Yaskawa Motoman is a leading robotics company in the Americas. Yaskawa provides automation products and solutions for virtually every industry and robotic application; including arc welding, assembly, coating, dispensing, material handling, material cutting, material removal, packaging, palletizing and spot welding. The product line includes more than 175 distinct robot models and a full-line of pre-engineered "World" solutions that are complete application specific work cells, including robot, process and safety equipment. Yaskawa Motoman is backed by Yaskawa Electric Corporation of Japan.

MOTOROLA
SOLUTIONS

Motorola

www.motorolasolutions.com

Motorola Distribution Automation Solutions provide real-time remote monitoring and control of your infrastructure and facilities. By combining multiple technologies, you can ensure the system meets reliability indices, reduces and prevents outages and accelerates response to problems. In addition to providing business-critical benefits, electric utility companies also are using Motorola Distribution Automation Solutions to deliver better service to their customers.

MTE

AN SL INDUSTRIES COMPANY

MTE Corporation

www.mtecorp.com

MTE Corporation, an SL Industries Company, provides simple, robust power quality solutions. Power quality management requirements differ significantly by utility, industry, application and country. MTE offers many power quality and filter products for both input (line-side) and output (load-side) of variable frequency drives (VFDs) and power conversion equipment.

MTE provides complete power quality solutions for automation in oil and gas, water/wastewater, HVAC and other industries. MTE offers innovative DC Link Chokes, Harmonic Filters, Motor Protection Filters and SineWave Filters.

A Nidec Group Company
SHIMPO

Nidec-Shimpo

www.drives.nidec.shimpo.com

NIDEC-SHIMPO is a global leader in the manufacturing of high precision gearing solutions for the motion control and heavy industrial markets. A broad range of planetary, cycloidal and worm gearing products are readily available out of our North American assembly facility in Itasca, IL. Our products are used in the most productive high speed machinery worldwide.

N-TRON

THE INDUSTRIAL NETWORK COMPANY

N-TRON

www.n-tron.com

N-TRON Corporation develops, manufactures, and markets highly reliable industrial network products designed to solve the most demanding Industrial Ethernet communications requirements for mission-critical MIS, data acquisition, and control applications. Their customers are engineering and information technology professionals who require Ethernet products to operate in harsh industrial environments with high throughput and minimum downtime.

PANDUIT®

Panduit Networks

www.panduit.com

Panduit is a world-class developer and provider of leading-edge solutions that connect, manage and automate the physical infrastructure. Panduit Unified Physical InfrastructureSM (UPI)-based solutions help customers integrate core business systems for a smarter, unified business foundation.

Precision Technology

USA

ENGINEERED ACTUATORS

Precision Technology

www.pt-usa.net

Precision Technology offers a comprehensive range of rodless and rod-style linear actuators, screw jacks, linear tables, and modified linear products. No matter what your problem may be, Precision Technology sales and applications engineers, certified technicians and master assemblers are available to assist in integrating our products into your system. All of their engineers have technical degrees and are experts in our industry. Precision Technology offers expertise in engineering complete mechanical linear systems packages.

Prosoft Technology

www.prosoft-technology.com

ProSoft Technology specializes in the development of communication solutions compatible with large automation suppliers' controllers such as Rockwell Automation and Schneider Electric. The primary focus is to provide connectivity solutions that link dissimilar automation products. ProSoft Technology provides field-proven connectivity and communication solutions that bridge between various automation products as seamlessly as if they were all from the same supplier.

RF IDEAS

RF IDEas

www.rfideas.com

RF IDEas, founded in 1995, is the innovator of WaveID[®], the new standard for badge-based authentication and identification solutions powered by RF IDEas readers. Under the WaveID umbrella, RF IDEas designs, develops, and manufactures a complete line of pcProx[®] card readers that support nearly every proximity and contactless smart card in use worldwide.

ROLLON®

Linear Evolution

Rollon

www.rollon.com

ROLLON is a leading manufacturer of linear motion systems, guides and linear actuators. Their principal products include ROLLON's Compact Rail linear guide, Telescopic linear guides and our ActuatorLINE[™], and Uniline family of actuators, that are designed to meet the requirements of engineers involved in machine design applications in the primary fields of industrial automation and robotics.

Roxtec, Inc.

www.roxtec.com

Roxtec develops, manufactures, and sells complete sealing solutions for cable and pipe penetrations. Their modular-based seals are the foundation, but our sustainable growth is primarily built on committed personnel, strong values, and a clear customer focus. Roxtec's close co-operation with customers and the teamwork within their own global organization create excellent conditions for continuous improvement.

Schaffner Group

www.schaffnerusa.com

The Schaffner Group is the international leader in the development and production of off-the-shelf and custom EMC/EMI filters, harmonic filters and magnetic components for the global power electronics industry, supporting energy efficiency and reliability.

SeQent

www.seqent.com

SeQent is the recognized world leader in plant floor messaging and visualization technology. With hundreds of installations worldwide SeQent's solutions help many of the world's largest manufacturers produce their products efficiently and to high quality standards. SeQent provides a hardware/software bridge from Alarms and Events that occur in plant floor equipment/applications and gets information into the hands of people so real-time decisions can be made that impact productivity, quality and the bottom line. SeQent can unify all of your communication needs.

Sipco | MLS

www.sipco-mls.com

Since 1984 SIPCO|MLS has been an electromechanical systems developer and integrator with a focus in power transmission. Based in Webster, Texas, SIPCO|MLS has developed extensive engineering, manufacturing and testing resources that allow for thinking outside the box when solving complex electromechanical challenges. Their products include the following gearboxes and configurations: Planetary, Worm Gearboxes, Parallel Shaft, Right Angle, and Spiral Bevel, as well as Helical and Herringbone open gears.

Softing

<http://company.softing.com/en/startpage.html>

Softing designs and builds industrial products for leading factory automation companies to help them simplify data transaction, control, and communications tasks. Products include Appliance Transaction Modules (ATM) for both Enterprise and Controller-level data exchange. Enterprise Appliance Transaction Modules (eATMs) simplify and manage the exchange of data between general-purpose computer systems at the plant and enterprise level with factory floor controllers.

Spectrum Controls, Inc.

www.spectrumcontrols.com

Since 1983, Spectrum Controls has continued to be the premier provider of hardware and related software products for the industrial controls marketplace. Products fall into four major categories: I/O modules, HART analog I/O, Industrial Marquee Displays, and Remote Access/Communications modules.

Stober

www.stober.com

STOBER Drives, Inc. was established in 1991, in Maysville, Kentucky to manufacture and assemble gearboxes for the North American market. It is responsible for supplying gear solutions for the servo and power transmission markets. STOBER solutions include gear reducers and servo motors.

SyTech, Inc.

www.thereportcompany.com

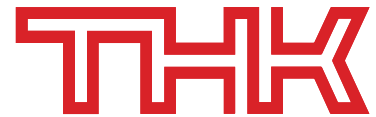

SyTech has been providing report generation and analysis software for industry since 1991. They are recognized as a leader in advancing the technology used to automate and distribute reports in Excel, PDF and Web formats. Their innovative approach delivers products that are quick to implement, reliable and cost effective.

TCI, LLC

www.transcoil.com

TCI's mission is to be the supplier of choice for products and support that increase the value and improve the overall system performance of electronic power conversion processes. TCI offers a number of solutions that reduce or eliminate harmonic distortion, including line reactors, passive harmonic filters, and active harmonic filters. With proper application, these harmonic filters are used to meet the IEEE-519 specification on harmonics.

THK

www.thk.com

THK's creative ideas and unique technology made the company worldwide pioneers in the development of the Linear Motion (LM) Guide mechanism. Today, their LM Guide devices are an indispensable component of mechanical and electronic systems in a wide variety of industries. THK has also developed many other unique mechanical components, including the Ball Spline, Ball Screws and Link Balls.

WITTENSTEIN

WITTENSTEIN

wittenstein-us.com

Trust WITTENSTEIN quality for your intelligent drive systems. Whether your application is highly complex, runs in a harsh environment, or is just hard-working, our components help optimize performance and efficiencies. Call on our technical engineers to assist with your design and product needs. Contact us at 1-630-540-5300 or visit wittenstein-us.com.

Keep Your Business Moving

We offer products for your industrial automation solution needs featuring automation equipment, MRO products, lighting and energy solutions, general supplies, industrial consumables, renewable energy, safety, and wire and cable. Through EESCO, you have access to inventory worth in excess of \$300 million.

All the products and supply chain solutions your business needs to run faster and more efficiently are at EESCO!

EESCO works directly with companies to develop factory automation applications and systems that specifically address their needs. We offer engineering expertise for specific application problems, product demos, and training.

Our Tech Centers and more than 50 Automation Engineers located throughout the company are available to assist you at every stage from concept through sales, installation, and operation.

 **Help is just a phone call away.** EESCO's TECH411 specialists offer internal telephone technical support for customers on PLCs, drives (AC and DC), motion control, industrial PCs, software, operator interface, and control networks.

Reach them at 1-888-TECH411 or
Tech411@eescodist.com

- Automation and Energy Specialists
- Contract pricing
- Flexible return policy
- EDI and XML, electronic document transmission technologies
- eCommerce – including web and ERP integration
- Access to leading manufacturers
- 24-hour emergency service
- Inter-branch transfers
- Technical phone support
- Dozens of Value Creation Solutions, including:
 - Energy and Lighting Audits and turnkey solutions
 - Safety Audits
 - Arc Flash Prevention
 - Lamp Recycling
 - Repairs
 - Inventory and Tool Crib Management

Put EESCO's Team to Work For You

If you engage EESCO early in the design process for CAPEX projects, such as new or expanded production lines, plant expansions, or new plants, we can deliver value and cost savings between 18-22%. EESCO has a proven track record of delivering savings in the areas of integration and controls, lighting, and electrical distribution. For more information, please ask your sales rep for examples of our proven success. Call us today at **1-800-330-0011**.

Exceeding expectations for nearly a century

EESCO (Englewood Electrical Supply Co.) was founded in 1919 in the Englewood District of Chicago with a single branch location on Halsted Street. After 77 years of expansion and acquisition we were acquired in 1996 by WESCO. Today we have 25 locations in eight states and represent over 400 manufacturers' product lines.

WESCO International, Inc. (NYSE: WCC), a publicly traded Fortune 500 holding company headquartered in Pittsburgh, Pennsylvania, is a leading provider of electrical, industrial, and communications maintenance, repair and operating ("MRO") and original equipment manufacturers ("OEM") product, construction materials, and advanced supply chain management and logistic services. 2014 annual sales were approximately \$7.9 billion. The Company employs approximately 9,400 people, maintains relationships with over 18,000 suppliers, and serves over 65,000 active customers worldwide. Customers include commercial and industrial businesses, contractors, government agencies, institutions, telecommunications providers and utilities. WESCO operates nine fully automated distribution centers and approximately 485 full-service branches in North America and international markets, providing a local presence for customers and a global network to serve multi-location businesses and multi-national corporations.
